GRANVILLE WORKS, BIRMINGHAM,

July 1*st*, 1863.

ON issuing a New Edition of our complete PATTERN BOOK, we respectfully draw attention to the following particulars, which distinguish it from its predecessors.

(1) We have re-arranged this Edition on an entirely new and, we trust it will be found, greatly improved plan. This we considered very desirable, inasmuch as in previous Books no sort of classification existed, and a confusion was the result, which, bad at first, the increased comprehensiveness of our manufacture had lately rendered still more troublesome and perplexing.

The arrangement will be found to be as follows :—

			PAGES	
DISH COVERS	including	Dishes, Soup Tureens, &c.	1 to 33	inclusive.
PATENT TEA AND COFFEE POTS	,,	Urns, Sugar Basins, &c.	34 to 74	,,
CULINARY ARTICLES	,,	Hasteners, Saucepans, Tea Kettles, Tea and Coffee Pots, Buckets, Candlesticks, &c....	75 to 158	,,
STAMPED TINNED HOLLOW WARES	,,	Bowls, Milk Pans, Dishes, Prospecting Pans, &c.	109 to 119	,,
BATHS	,,	Toilet Wares, &c....	161 to 217	,,
LANTERNS	,,	Ship, Hand, Railway, and Carriage	222 to 240	,,
BOXES	,,	Sugar, Travelling, Officers', Cash, &c.	245 to 265	,,
GROCERS' FURNITURE	,,	Canisters, Show Bowls, &c.	267 to 289	,,
COAL VASES	,,	Scoops	293 to 339	,,
MISCELLANEOUS	,,	Camp Kettles, Pudding Pans, Oil Fillers, Spittoons, Oil Pumps, Beer Cans, &c.	340 to 355	,,
TEA TRAYS, &c.	,,	Bread, Knife, and Cheese Trays...	356 to 362	,,
MOULDS	,,	Jelly and Cake	363 to 432	,,
FURNITURE	,,	Tinmen's and Brass Work	433 to 465	,,

From the collections of Sydney Living Museums / Historic Houses Trust of NSW

(2) In carrying out this classification w found it absolutely necessary to place each article under a new number.

Though this may at first sight appear a disadvantage, it is not in reality so, as we are able to execute orders with equal facility and correctness from either the old or new numbers, and prepared to mark the goods as they may be ordered from this or former books.

(3) We have just completed very extensive alterations and additions to our Japanning Department, and have secured the services of several first-class workmen. We are therefore prepared and fully determined to turn out all kinds of Japanned Work of first-rate style and finish.

We have endeavoured to make each department as complete as possible, and have added several new patterns in Block-Tin, Japanned, and Stamped Tinned Hollow Wares.

Other new patterns are in hand, of which due notice will be given from time to time.

Moveable Cup with Pan for Dripping.

J. Green's Patent Self Basting & Cooking Apparatus.

SOLE MANUFACTURERS,

J. H. Hopkins & Son.

THE ABOVE SCREEN

BEING OF A NOVEL AND ENTIRELY DIFFERENT CONSTRUCTION TO ANY BEFORE MANUFACTURED, COMBINES IMPORTANT ADVANTAGES.

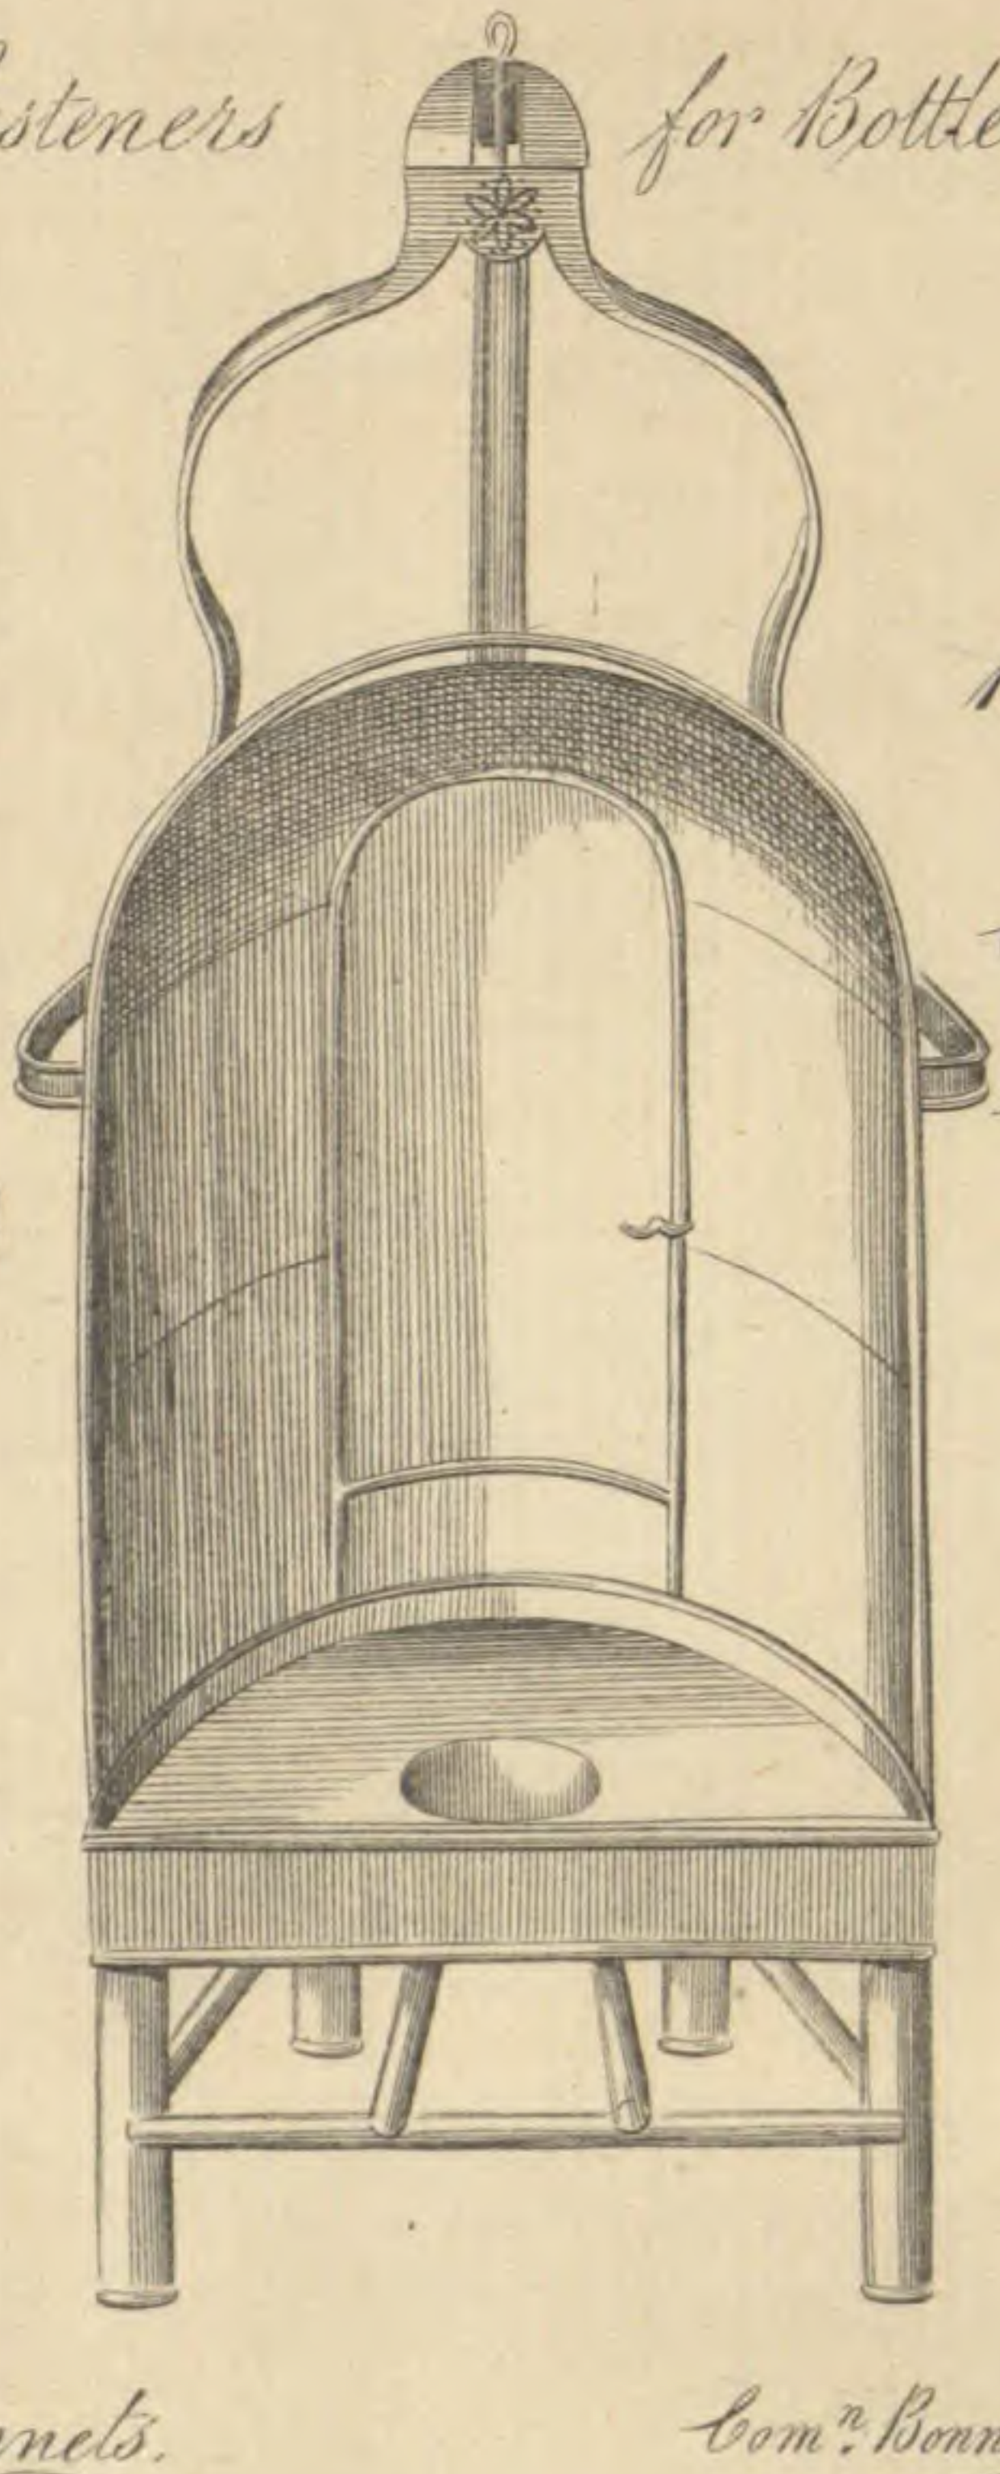

Amongst others by a simple apparatus the necessity for constantly basting the meat is avoided. A sufficent quantity of Dripping being put into the Box A and melted by the heat of the fire it is allowed to flow continually over the meat and the supply may be increased or diminished by means of the Screw. The Gravy runs into a Cup B in the well of the Dripping Pan, and when necessary the Cup can be taken out and its contents poured into the Box A for the purpose of basting as above mentioned. Another important advantage is that when not being used for Roasting it is readily converted by means of the Shelves into an effective American or ordinary Oven and as such may be used for a variety of Culinary purposes. If supplied with a Britten's Patent Jack, as above, it is less costly than any other Screen possessing similiar advantages..

MANNING'S PATENT CANDLESTICK.

6 7 in.

Block Tin
Japan'd Brown

No. 1033

This Invention comprises all the utility of ordinary Candlesticks, together with its own peculiar advantages.

Firstly,—Economy; as by it, the **Ends of Candles** may be burnt out without the use of save-alls, &c.

Secondly,—Convenience; as any sized Candle may be held **firmly** without the use of paper wrappings or detached springs.

Thirdly,—Cleanliness; as the Candle, being **held firmly in the socket, cannot shake about and drop the grease;** nor will the socket be filled up with grease, there being no paper round the end of the Candle to catch fire.

DIRECTIONS FOR USE.

The button marked (B) should be drawn back so that the Candle may be placed in the socket, care being taken that it descend to the *bottom of the socket;* then the Candle will be firmly held by the curved spring marked (A). When the Candle is burnt down level with the socket it may be raised with ease as in ordinary Candlesticks, and burnt out to the extreme end.

SOLE LICENSEES AND MANUFACTURERS,

J. H. HOPKINS & SON,

GRANVILLE STREET, BROAD STREET,

BIRMINGHAM,

BY WHOM ALONE THE TRADE IS SUPPLIED.

The Patent Spring can be attached to any Candlestick at an additional Cost of per dozen.
